Mathematical Analysis for Computer Science

Grading System and Exercise Sessions

GRADING SYSTEM

- 70% Exam (written)
- 20% Solving and presenting an exercise
- 10% Portfolio (~15 exercises to be indicated later)

EXERCISE SESSIONS

Starting with week 3 (11-17 Oct.), for each group's upcoming Exercise Session a number of students will be randomly chosen, a different exercise being assigned randomly to each of them. Exercises have to be solved in advance and presented at the corresponding Exercise Session. The (handwritten) solutions should also be uploaded in the group's channel such that all colleagues can follow the explanations.

BONUS POINTS

Any valuable contribution will be awarded Bonus Points, which will be added to the student's Final Grade.
